Subject Index

A

Adiposity, Editorial, 328
Adolescents, "cheating" in diabetic children and, Special Article, 116
—, family characteristics of diabetic adolescents, relationship to metabolic control, 586
—, group approach to management, Brief Communication, 620
—, psychological factors and blood glucose regulation in insulin-dependent diabetic, 610
Aging, glucose intolerance and, Review, 493
Alberti, George, Editorial, 331
Albuminuria, reduced, antihypertensive treatment of insulin-dependent diabetic patients with nephropathy, 459
Allergy, immediate-type, diabetic patients with insulin intolerance, Symposium, 196
Angiopathy, diabetic, sickle cell trait as a risk factor for, Letter, 659
Antibodies to viruses and pancreatic islets in nondiabetic and insulin-dependent diabetic patients, 525
Antibody response to insulin, pancreatic polypeptide and glucagon antibodies, 337
Antihypertensive treatment of insulin-dependent diabetic patients, reduced albuminuria, 459
Anti-insulin IgE, insulin allergy and, Brief Communication, 104
Antipyrine metabolism, fenfluramine therapy in non-insulin-dependent diabetic patients, 535
Arterial calcification, elevated leg systolic pressures and, in diabetic occlusive vascular disease, Brief Communication, 289
Artifactual hypoglycemia, nucleated RBC and, Case Report, 113
Artificial endocrine pancreas, biosynthetic human insulin in control and insulin-dependent patients, Symposium, 155
—, pathophysiology and treatment of diabetes mellitus, Festschrift, 11
Atherosclerosis, pathogensis in diabetes mellitus, Review, 121
Autonomic nervous function in asymptomatic diabetic patients with peripheral neuropathy, 529

B

Bacteria, production of human insulin, Festschrift, 64
Basal C-peptide, concentrations in discrimination of insulin-dependent and non-insulin-dependent diabetes, 616
Basement membrane thickening, Letter, Reply, 445
Binding of biosynthetic human insulin, to human antibodies and receptors, Symposium, 248
—, of insulin, to rat pancreatic islets, comparison between pancreatic and biosynthetic human insulin, Symposium, 252
—, properties, biologic activity and, of biosynthetic human insulin in rat hepatocytes and mouse soleus muscle, Symposium, 223
Biologic actions, biosynthetic human insulin in vitro, Symposium, 205
Biologic activity, and binding affinity of biosynthetic human insulin in rat adipoctyes, Symposium, 250
—, biosynthetic human insulin in control and insulin-dependent patients monitored by artificial endocrine pancreas, Symposium, 155
—, in vivo and in vitro studies with biosynthetic human insulin, Symposium, 170
—, insulin binding, metabolism and, of biosynthetic human insulin, Symposium, 244
—, pharmacokinetics and, of biosynthetic human insuling in rat, Symposium, 238
—, receptor binding and, in vitro of biosynthetic human insulin, Symposium, 209
—, receptor binding properties and, of biosynthetic human insulin in rat hepatoctyes and mouse muscle, Symposium, 223
Biosynthesis of insulin, genetic and evolutionary aspects, Festschrift, 4
Biosynthetic human insulin, binding to human antibodies and receptors, Symposium, 248

—, binding to human erythrocytes, comparison with pork and human insulin, Symposium, 215
—, biologic actions in vitro, Symposium, 205
—, biologic activity and pharmacokinetics in rat, Symposium, 238
—, biologic activity and receptor binding properties in rat hepatocytes and mouse soleus muscle, Symposium, 223
—, biologic and immunologic in vivo and in vitro studies, Symposium, 170
—, biologic potency and binding affinity in rat adipocytes, Symposium, 250
—, chemical, physical, and biologic properties, Symposium, 147
—, clinical trials, Symposium, 260
—, comparison of biologic activity with pork insulin in juvenile-onset diabetes, 193
—, comparison with pancreatic human insulin, action on adipoctyes and chick embryo fibroblasts, Symposium, 257
—, comparison with pork insulin, glucose clamp technique in normal subjects, Symposium, 163
—, comparison with pork insulin in Gerritzen test, Symposium, 180
—, comparison with pork insulin using glucose controlled insulin infusion system, Symposium, 189
—, effect in healthy men on plasma glucose and nonesterified fatty acids in comparison with pork insulin, Symposium, 175
—, future role in treatment of diabetes mellitus, Symposium, 262
—, immediate-type allergy, insulin intolerance, Symposium, 196
—, immunologic properties in vitro, Symposium, 202
—, in Vitro studies, an overview, Symposium, 144
—, insulin binding, biologic activity, and metabolism of, Symposium, 244
—, insulin binding to rat pancreatic islets, Symposium, 252
—, internalization of ^{125}I-insulin by IM-9 lymphocytes, Symposium, 220
—, pharmacokinetics, Symposium, 168
—, plasma glucose response of normal fasting subjects to neutral regular and NPH, Symposium, 183
—, potency determined in vitro, Symposium, 228
—, progress and prospects, Symposium, 140
—, receptor binding and biologic activity in vitro, Symposium, 209
—, receptor binding and, effect on 2-deoxyglucose transport, Symposium, 254
—, receptor binding on pig hepatocytes, Symposium, 235
—, Symposium introduction, 139
Blood glucose, insulin dosage adjustment algorithms for patients who monitor, Practical Diabetes, 311
Body weight, fenfluramine therapy in non-insulin-dependent diabetic patients, 535
Books, 446
Brief Communications, 96, 99, 104, 285, 289, 293, 480, 484, 487, 556, 559, 620, 624, 627, 631, 634, 636
Brittle diabetes, long-term, ambulatory, subcutaneous insulin infusion vs. multiple daily injections in patients with, 269

C

Camp, research at, social questions, Letter, 507
Carbohydrate tolerance, impaired early insulin response to glucose, 85
Case Reports, 108, 113, 296, 299,
Cereals, lack of effect of refining on glycemic response, 509
—, plant fiber content of selected, Special Article, 490
Children, "cheating" in adolescents and, Special Article, 116
Chlorpropamide, comparison with glibenclamide treatment of maturity-onset diabetes, by fasting plasma glucose concentrations, Brief Communication, 293
—, metabolism, Letter, 332
Cholecystokinin, radioimmunoassay and diabetes mellitus, Festschrift, 47
Chronic illness, physician-patient communication, Special Article, 427
Chylomicronemia syndrome in diabetes mellitus, 343
Cimetidine, insulin allergy and, Letter, 503
Classification of diabetes, Letter, 137
Clinical application of insulin, Festschrift, 45
Clinics, symptom reduction of diabetic patients, 476
Commentary, 325
Continuous insulin infusion, cutaneous complications, Brief Communication, 624
—, patient selection and training and, Letter, 659
Coronary artery disease, improving survival after renal transplantation, Brief Communication, 380
Cortisol, nocturnal release during hypoglycemia in diabetes, 514
Cortisol/creatinine ratio, urine controlled insulin-induced hypoglycemia, Brief Communication, 559
C-peptide, basal serum, discrimination of insulin-dependent and non-insulin-dependent diabetes, 616
—, secretion, recovery from decompensated non-insulin-dependent diabetes mellitus, 354

D

Dawn phenomenon, early morning glucose rise, implications for diabetic intraday blood glucose variations, 579
2-Deoxyglucose transport, receptor binding and effect of biosynthetic human insulin, Symposium, 254
Diabetes, maturity-onset, pathogenesis, Festschrift, 58
Diabetes mellitus, artificial endocrine pancreas, impact on pathophysiology and treatment of, Festschrift, 11
—, biosynthetic human insulin and future treatment of, Symposium, 262
—, chylomicronemia syndrome in, 343
—, diagnosis, limitation of fasting plasma glucose, 556
—, educational deficits as cause for hospital admission, Brief Communication, 487
—, epidemiology, Prince Edward Island studies, 519

—, family medical history and patient understanding, Brief Communication, 285
—, gastrointestinal and neuronal peptides in pathophysiology of, Review, 435
—, hemoglobin A_1 properties in, and uremic patients, Brief Communication, 484
—, insulin, pancreatic polypeptide, and glucagon antibodies, 337
—, insulin-dependent, plasma lipids and microangiopathy in, 447
—, non-insulin-dependent, recovery from, C-peptide secretion studies, 354
—, nutrition therapy in non-insulin-dependent, 81
—, office guide to diagnosis and classification, 335
—, pathogenesis of atherosclerosis in, Review, 121
—, radioimmunoassay and, Festschrift, 47
—, receptor depletion correction with tolbutamide and reduced insulin, Case Report, 299
—, symptomatic hypoglycemia in young patients, 601
Diabetic renal failure, psychosocial crisis, Brief Communication, 99
Diagnostic criteria, selection of, for "diabetes mellitus," Letter, 137
Dialysis, glycosylated hemoglobin and blood glucose fluctuations in insulin-dependent diabetic children, 551
Diet, algorithms and, Letter, Reply, 506
—, "cheating" in diabetic children and adolescents, Special Article, 116
—, maturity-onset diabetes of the young, control with hormonal normalization and, Case Report, 108
—, plant fiber content of selected cereals, Special Article, 490
Dwarfism, diabetic, progressive retinopathy, improved control, 360

E

Editorials, 134, 328, 443, 573, 657
Editor's note, policy on research at camps, 507
Education, assessment instruments, qualitative issues for diagnostic instruments for diabetic patients, 468
—, factors affecting diagnosis of diabetic patients, 275
—, readability of self-care instructions, Brief Communication, 627
Endocrine pancreas, artificial, pathophysiology and treatment of diabetes mellitus and, Festschrift, 11
Epidemiologist and diabetologists, Editorial, 135
Erythrocytes, biosynthetic human insulin binding to, comparison with pork insulin, Symposium, 215
Etiologic aspects, types of diabetes, Festschrift, 68
Evidence, implications, and corollaries, Editorial, 573

F

Family characteristics, diabetic adolescents and, relationship to metabolic control, 586
Fenfluramine therapy in non-insulin-dependent diabetic patients, 535
Festschrift for Rachmiel Levine, Introduction, 1
Fiber content, plant fiber, selected breakfast cereals, Special Article, 490
Fibroblastic cells, insulin and other hormone binding, Festschrift, 33

G

Gastrointestinal peptides, neuronal and, in the physiology of diabetes mellitus, Review, 435
Gastrointestinal symptoms, relief by correcting insulin excess, Case Report, 296
Genetics, aspects of insulin biosynthesis, Festschrift, 4
Gerritzen test, comparison of biosynthetic human insulin and pork insulin, Symposium, 180
Glibenclamide, comparison with chlorpropamide treatment of maturity-onset diabetes, by fasting plasma glucose concentrations, Brief Communication, 293
Glucose, blood concentration, absorption, serum insulin concentrations after injections of regular insulin, 366
—, clamp technique, activity of biosynthetic human insulin and pork insulin, in normal subjects, Symposium, 163
—, comparison of blood glucose test strips, Symposium, 407
—, comparison of methods for blood glucose monitoring, Symposium, 404
—, controlled insulin infusion, comparison of biosynthetic human insulin and pork insulin using, Symposium, 189
—, dawn phenomenon, diabetic intraday blood glucose variation, 579
—, early insulin response in subjects with impaired carbohydrate tolerance, 85
—, evaluation of reflectance photometer for home blood monitoring, 547
—, fasting plasma, limitation for diagnosis of diabetes mellitus, Brief Communication, 556
—, homeostasis, fenfluramine therapy in non-insulin-dependent diabetic patients, 535
—, hemoglobin A_{1c} comparisons with conventional measures of control, 349
—, hemoglobin A_{1c} determinations in diabetic pregnancy, 541
—, home self-monitoring, cost and accuracy comparisons, Symposium, 396
—, intolerance, aging and, Review, 493
—, intolerance, office guide to diagnosis and classification of diabetes mellitus and, 335
—, intravenous self-monitoring, Symposium, 420
—, lack of effect of refining on glycemic response to cereals, 509
—, plasma, insulin and, after fructose meals in non-insulin-dependent diabetes mellitus, 464
—, psychological factors and blood glucose regulation in insulin-dependent diabetic adolescents, 610
—, rapid estimation, Symposium, 392

—, reagent strips with and without a meter, Symposium, 417
—, self-monitoring without a meter, Symposium, 414
—, stability of reacted reagent test strips, Symposium, 412
Glycemic response, lack of effect of refining of cereals, 509
Glycosylated hemoglobin, blood glucose fluctuations in insulin-dependent diabetic children, with and without prior dialysis, 551
—, patient-determined measurements, Brief Communication, 480

H

Hemoglobin A_1, properties of diabetic and uremic patients, Brief Communication, 484
Hemoglobin A_{1c}, comparison with three factors: percent sugar-free urine tests, 24-h glucose excretion as percent of carbohydrate intake, and mean preprandial blood glucose, 349
—, determinations in diabetic pregnancy, 541
Home monitoring, algorithms for, Letter, 505
—, reflectance photometer, evaluation for blood glucose monitoring, 547
—, Symposium, 392
Hormones, insulin binding by fibroblastic cells, Festschrift, 33
—, insulin binding to receptor, importance of receptor and, Festschrift, 27
—, normalization, maturity-onset diabetes of the young, control with diet and, Case Report, 108
—, response, metabolic and, to insulin therapy in diabetic surgical patient, 279
Human insulin, bacterial production of, Festschrift, 64
—, differences in porcine, bovine and, binding with anti-insulin IgE, Brief Communication, 104
Hyperkalemia, diabetic ketoacidosis and, Letter, 576
Hyperlipidemia, disorders in diabetes, Review, 561
Hypoglycemia, artifactual, nucleated RBC and, Case Report, 113
—, coma and subcutaneous insulin infusion by portable pump, Case Report, 389
—, insulin-induced, urine cortisol/creatinine ratio and, Brief Communication, 559
—, nesidioblastosis in insulin-mediated adult, Case Report, 383
—, nocturnal cortisol release in diabetes, 514
—, symptomatic, in young diabetic patients, 601
Hypoglycemic agents, absence of hyponatremia with, Letter, 502
Hyponatremia, absence of, with hypoglycemic agents, Letter, 502

I

Immunogenicity of insulin, radioimmunoassay and diabetes mellitus, Festschrift, 47
Immunoglobulin, elevation in non-insulin-dependent diabetic patient, Brief Communication, 636
Immunologic properties of biosynthetic human insulin in vitro, Symposium, 202
Immunologic studies, immediate-type allergy against insulin with diabetic patients with insulin intolerance, Symposium, 196
Implantable insulin delivery system, future therapy for insulin-dependent diabetic patient, Review, 319
Infusion, combined continuous subcutaneous, and multiple subcutaneous injections in insulin-dependent diabetes, 595
—, continuous subcutaneous insulin, cutaneous complications, Brief Communication, 624
—, continuous subcutaneous insulin, Festschrift, 54
—, implantable insulin delivery systems, future therapy, Review, 319
—, long-term, ambulatory, subcutaneous vs. multiple daily injections in brittle diabetic patients, 269
—, low dose insulin, in diabetic surgical patient, metabolic and hormone responses, 279
—, present and future expectations of insulin delivery systems, Commentary, 325
—, subcutaneous insulin, programming delivery with meals during, 265
Insulin, absorption, serum insulin concentration, and blood glucose after injection, 366
—, accuracy of patient self-injection doses, Letter, 333
—, antibody response to, 337
—, bacterial production of human, Festschrift, 64
—, biosynthesis, genetic and evolutionary aspects, Festschrift, 4
—, clinical application, Festschrift, 45
—, dosage adjustment algorithms for patients who monitor blood glucose, Practical Diabetes, 311
—, dose change with increased purity, Letter, 504
—, early response to glucose in subjects with impaired carbohydrate tolerance, 85
—, excess, gastrointestinal symptom relief by correction of, Case Report, 296
—, internalization of ^{125}I-insulin by IM-9 cultured lymphocytes, comparison between port and biosynthetic human insulin, Symposium, 220
—, intolerance, immediate-type allergy, Symposium, 196
—, long-term, ambulatory, subcutaneous infusion vs. multiple daily injections in brittle diabetic patients, 269
—, plasma glucose and, after fructose meals in non-insulin-dependent diabetes mellitus, 464
—, present and future expectations of infusion systems, Commentary, 325
—, programming delivery with meals during subcutaneous infusion, 265
—, rectal administration of insulin suppository in normal and diabetic subjects, 454
—, subcutaneous infusion, hypoglycemic coma and portable pump, Case Report, 389
—, therapy in diabetic surgical patient, responses to low dose insulin infusion, 279
Insulin action, molecular level, introductory remarks, Festschrift, 3

—, 1948–80, Festschrift, 39
Insulin allergy, cimetidine and, Letter, 503
—, differences in porcine, bovine, and human insulin binding with anti-insulin IgE, Brief Communication, 104
Insulin binding, biologic activity, and metabolism of biosynthetic human insulin, Symposium, 244
—, hormones and, by fibroblastic cells, Festschrift, 33
—, receptor importance vs. hormone importance, Festschrift, 27
Insulin infusion, combined continuous subcutaneous and multiple subcutaneous injections in insulin-dependent diabetes, 595
—, continuous subcutaneous aspect in diabetes, Festschrift, 54
Insulin-dependent diabetes, antibodies to viruses and pancreatic islets in, and in nondiabetic patients, 525
—, biosynthetic human insulin binding to erythrocytes, comparison with pork insulin, Symposium, 215
—, biosynthetic human insulin in control and, monitored by artificial endocrine pancreas, Symposium, 155
—, combined continuous subcutaneous insulin infusion and multiple subcutaneous injections, 595
—, dawn phenomenon, diabetic intraday blood glucose variation, 579
—, etiologic aspects, Festschrift, 68
—, future therapy, implantable insulin delivery system, Review, 319
—, glycosylated hemoglobin and blood glucose fluctuations in children, 551
—, nocturnal cortisol release during hypoglycemia, 514
—, plasma lipids and microangiopathy in, 447
—, psychological factors and blood glucose regulation in adolescents, 610
—, reduced albuminuria during antihypertensive treatment of diabetic patients with nephropathy, 459
Insulin-mediated hypoglycemia, nesidioblastosis in adult, Case Report, 383
Intravenous monitoring, home blood glucose, Symposium, 420
In vitro studies, biologic actions of biosynthetic human insulin, Symposium, 205
—, biosynthetic human insulin, Symposium, 170
—, immunologic properties of biosynthetic human insulin, Symposium, 202
—, potency of biosynthetic human insulin, Symposium, 228
—, receptor binding and biologic activity of biosynthetic human insuliln, Symposium, 209
In vivo studies, biosynthetic human insulin, Symposium, 170

J

Jet injection, plasma free insulin profiles after administration, comparison with conventional syringe injection, Brief Communication, 377
Juvenile-onset diabetes, comparison of biosynthetic human insulin and pork insulin with glucose controlled insulin infusion system, Symposium, 193
—, control and serum lipids, relationship, 76

K

Ketoacidosis, diabetic, hyperkalemia and, Letter, 576
Kidney, failure, diabetic management and, Practical Diabetes, 430
—, transplantation, survival for diabetic patients with coronary artery disease, Brief Communication, 380

L

Letters to the Editor, 137, 332, 445, 502, 576, 658
Lipids, control and serum in juvenile-onset diabetes, 76
—, disorders in diabetes, Review, 651
Lipoproteins, chylomicronemia syndrome in diabetes mellitus, 343
Lymphocytes, internalization of ^{125}I-insulin by, comparison with pork and biosynthetic human insulin, Symposium, 220

M

Maturity-onset diabetes, chlorpropamide and glibenclamide comparison by fasting plasma glucose concentrations, Brief Communication, 293
—, of the young, control with hormonal normalization and dietary management, Case Report, 108
—, pathogenesis of, Festschrift, 58
Mauriac's syndrome, progressive retinopathy with improved control, 360
Metabolism, acute stress and, in diabetes, Letter, 658
—, evidence, implications, corollaries, Editorial, 573
—, family characteristics of diabetic adolescents and, 586
—, insulin binding, biologic activity and, of biosynthetic human inslulin, Symposium, 244
Microangiopathy, plasma lipids and, in insulin-dependent diabetes mellitus, 447
Multiplex families, reversal of seasonal clustering of diabetes, Brief Communication, 634

N

Nephropathy, reduced albuminuria during antihypertensive treatment of diabetic patients with, 459
Nesidioblastosis, insulin-mediated hypoglycemia in adult, Case Report, 383
Neuropathy, peripheral, autonomic nervous function in asymptomatic diabetic patients, 529
—, pyridoxine influence in diabetic, 606
Non-insulin-dependent diabetes, elevation of immunoglobulin levels in, Brief Communication, 636
—, etiologic aspects, Festschrift, 68
—, nutrition therapy in diabetes mellitus, 81
—, plasma glucose and insulin after fructose meals, 464

—, receptor disease?, Letter, 577
—, recovery from, C-peptide secretion studies, 354
Nucleated red blood cells, artifactual hypoglycemia and, Case Report, 113
Nutrition, intake in partly Westernized isolated population, Polynesian (Funafutian) studies, 92
—, pregnancy complicated by diabetes and, historical perspective, Review, 647
—, therapy in non-insulin-dependent diabetes mellitus, 81

O

Obesity, nutrient intake in partly Westernized isolated population, Polynesian (Funafutian) studies, 92

P

Pancreas, artificial endocrine, pathophysiology and treatment of diabetes mellitus, Festschrift, 11
Pancreatic human insulin, comparison with biosynthetic human insulin, action on adipocytes and chick embryo fibroblasts, Symposium, 257
Pancreatic islets, antibodies to viruses and to, in nondiabetic and insulin-dependent diabetic patients, 525
Pancreatic polypeptide, insulin and glucagon antibodies response to insulin, 337
Pathogenesis, atherosclerosis in diabetes mellitus, Review, 121
Patient education, deficits in, as cause for hospital admission in diabetes mellitus, Brief Communication, 487
—, factors affecting educational diagnosis of diabetic patients, 275
—, family medical history and, with diabetes mellitus, Brief Communication, 285
—, patient-determined glycosylated hemoglobin measurements, Brief Communication, 480
Peptides, gastrointestinal and neuronal, pathophysiology of diabetes mellitus, Review, 435
Peripheral neuropathy, pyridoxine influence in diabetic, 606
Personality, myth of diabetic individuals, Special Article, 640
Pharmacokinetics, biologic activity and, of biosynthetic human insulin in rat, Symposium, 238
—, biosynthetic human insulin, effects, Symposium, 168
Plasma free insulin, jet and conventional syringe injection, profiles after administration, Brief Communication, 377
Plasma glucose, fasting, diagnosis limitations with diabetes mellitus, Brief Communication, 556
—, nonesterified fatty acids and, biosynthetic human insulin and pork insulin comparison in healthy men, Symposium, 175
—, response of normal fasting subjects to biosynthetic human insulin and pork insulin, Symposium, 183
Plasma lipids, microangiopathy and, in insulin-dependent diabetes mellitus, 447
Pork insulin, biosynthetic human insulin binding to erythrocytes, comparison with, Symposium, 215
—, biosynthetic insulin activity and, using glucose clamp technique in normal subjects, Symposium, 163
—, comparison with biosynthetic human insulin in Gerritzen test, Symposium, 180
—, comparison with biosynthetic human insulin, plasma glucose and nonesterified fatty acids in healthy men, Symposium, 175
—, comparison with biosynthetic human insulin using glucose controlled insulin infusion system, Symposium, 189
—, plasma glucose response of normal fasting subjects to biosynthetic human insulin and, Symposium, 183
Portable pump, hypoglycemic coma and subcutaneous insulin infusion, Case Report, 389
Practical diabetes, 311, 430
Pregnancy, hemoglobin A_{1c} determinations, 541
—, nutritional management complicated by diabetes, historical perspective, Review, 647
Psychology, issues in diabetes, Editorial, 656
Psychological factors, blood glucose regulation and, in insulin-dependent adolescents, 610
Pyridoxine, diabetic peripheral neuropathy and, 606

Q

Quality instrumentation, developing educational diagnostic instruments for diabetic patients, 468

R

Radioimmunoassay, relevance to diabetes mellitus, Festschrift, 47
Receptor, depletion, in diabetes mellitus, correction with tolbutamide and reduced insulin, Case Report, 299
—, disease, non-insulin-dependent diabetes mellitus, Letter, 577
—, insulin binding to, importance of receptor vs. hormone, Festschrift, 27
Receptor binding, and effect of biosynthetic human insulin on 2-deoxyglucose transport, Symposium, 254
—, of biosynthetic human insulin on isolated pig hepatocytes, Symposium, 235
—, properties, biologic activity and, in vitro, biosynthetic human insulin, Symposium, 209
Reflectance photometer, evaluation for home blood glucose monitoring, 547
Renal failure, psychosocial crisis, Brief Communication, 99
Retinopathy, progressive, control in diabetic dwarfism (Mauriac's syndrome), 360
Review, 121, 319, 435, 493, 561, 647
Reviewers for *Diabetes Care*, 336

S

Seasonal clustering, reversal of diabetes in multiplex families, Brief Communication, 634

Self-care, patient recall of recommendations, Brief Communication, 96
—, readability of instructional pamphlets, Brief Communication, 627
Self-injection, accuracy of doses of insulin, Letter, 333
Self-management, group approach in adolescents and young adults, Brief Communication, 620
—, patient-determined glycosylated hemoglobin, Brief Communication, 480
Self-monitoring, blood glucose, insulin dosage adjustment algorithms and, Practical Diabetes, 311
—, blood glucose monitoring without a meter, Symposium, 414
—, comparison of accuracy and estimated cost of home monitoring, Symposium, 396
—, comparison of blood glucose test strips, Symposium, 407
—, intravenous blood glucose monitoring, Symposium, 420
—, meters or strips, Letter, 333
—, methods of blood glucose monitoring, Symposium, 404
—, modified procedure for calibrating meter, Symposium, 424
—, rapid glucose estimation, Symposium, 392
—, reagent test strips with and without a meter, Symposium, 417
Serum insulin concentration, absorption, and blood glucose responses, factors after regular insulin injection, 366
Serum lipids, relationship with control in juvenile-onset diabetes, 76
Serum lipoproteins, fenfluramine therapy in non-insulin-dependent diabetic patients, 535
Sickle cell trait, risk factor for diabetic angiopathy, Letter, 659
Statistics, Editorial, 329
Stress, acute, metabolism and, Letter, 658
Subcutaneous infusion, combined continuous, and multiple subcutaneous injection in insulin-dependent diabetes, 595
—, programming insulin delivery with meals during, 265
Subcutaneous insulin infusion, continuous, aspects in diabetes, Festschrift, 54
—, cutaneous complications, Brief Communication, 624
—, patient selection and training, Letter, 659
Sucrose and disease, Special Article, 305
Suppository, effectiveness of rectal administration of insulin, 454
Surgery, improving survival after renal transplantation for diabetic patients with coronary artery disease, Brief Communication, 380
Symptomatic hypoglycemia, young diabetic patients and, 601
Symptoms, reduction of, in diabetic patients in clinic treatment, 476
Systolic pressure, elevated leg and arterial calcification in diabetic occlusive vascular disease, Brief Communication, 289

T

Test strips, comparative study of blood glucose strips, Symposium, 407
—, comparison of blood glucose monitoring with and without a meter, Symposium, 417
—, stability for blood glucose determination, Symposium, 412
Tolbutamide, receptor depletion correction in diabetes mellitus and, Case Report, 299
Treatment, symptom reduction of diabetic patients in clinics, 476

U

Uremia, hemoglobin A_1 properties in, and diabetic patients, Brief Communication, 484
Urine cortisol/creatinie ratio, controlled insulin-induced hypoglycemia and, Brief Communication, 559
Urine specimen, first-voided, case for testing, Editorial, 443

V

Vascular diesease, diabetic occlusive, elevated leg systolic pressures and arterial calcifications, Brief Communication, 289
Viruses, antibodies to, and to pancreatic islets in nondiabetic and insulin-dependent diabetic patients, 525
Vision, long-term retention following vitrectomy in diabetic patients, Brief Communication, 631
Vitrectomy, long-term vision retention, Brief Communication, 631
